

A personal record, a collectible identity.

VISUAL SYSTEM

Distance first. A distinct color per milestone. Source labels stay visible.

Other series: PB / First Finish / Event Memory. Organizer and device records remain distinct.

From verified achievement to wallet ownership.

01 / RECORD

Complete a qualifying run.
Sync it to NeonShift.

02 / VERIFY

Check source and eligibility.
Wait for registry approval.

03 / PREVIEW

Choose public details.
Review metadata and SOL fee.

04 / APPROVE

Approve in your wallet.
Wait for chain confirmation.

CLAIM = USER-INITIATED MINT

Reaching a target does not automatically mint an NFT.

No tSKR spend. Review the current SOL estimate before approving.

Public blockchain ownership remains visible; optional detail sharing is not anonymity.

Raw GPS, heart rate and weight are not included in the achievement NFT.

Claim once. Keep the story. Show the evidence.

ELIGIBLE IS NOT MINTED

Locked / under review / pending approval stay separate from claimed.

CONFIRMED AND COLLECTED

Show the reveal, then open the collection and inspect the asset.

RETRIES DO NOT CREATE DUPLICATES

An existing on-chain receipt returns the existing asset instead of minting again.

LIVE DEMO CHECKLIST

Eligibility -> privacy + fee preview -> wallet approval -> confirmation -> collection

Show the actual asset and transaction on Devnet. Never replace them with sample IDs.
